

## Workshop venue

The workshop will take place at room 508 on 5<sup>th</sup> floor of School of Science building 1 (West wing) at the Hongo campus of the University of Tokyo.

## Access

The closest international airports to Hongo campus are [Narita \(NRT\)](#) and [Haneda \(HND\)](#).

[Access map from airports to the campus.](#)

From Narita airport, the easiest way to get to the campus is to take the [Keisei line](#) train to Keisei-Ueno station, from where it is a short taxi ride or a pleasant 15 min walk to the campus.

There are various options: the "Skyliner" is the fastest and most expensive (40 min, JPY 2470 to Keisei Ueno station), the "Keisei Main line" trains slowest and least expensive (80 min, JPY 1030), and the "Access Express line" somewhere in between. Alternatively, you can take the [Narita Express](#) train to Tokyo station (60 min, JPY 3020).

From Haneda airport, the easiest route is to take the Keikyu line to Shinagawa station, from where you take the JR Yamanote line to Tokyo Station. (Alternatively, take the Tokyo monorail from Haneda and transfer to the JR Yamanote line at Hamamatsushucho Station, going to Tokyo Station.)

From Tokyo Station, take the Marunouchi metro line to Hongo-sanchome Station, from where it is a 15 minutes' walk to the campus. Tokyo station is rather large, so it can take time and perseverance to transfer between lines.

Information and maps for the [Tokyo metro](#).

### **Accommodations**

- [Sanjo Conference Hall Tatsuokamon Annex](#)
- [Mukougaoka Faculty House](#)

### **WiFi**

eduroam is available. We strongly recommend to get eduroam account at your institute before you come.

### **Weather**

August is the hottest month of the year in Japan. It's also quite humid. You are safe inside a building because every room is air-conditioned. However, you should be careful when you stay outside in the day-time. In the worst case, you may suffer heatstroke. Please find some instruction to avoid heatstroke [here](#).
