

## Minutes of WP-meeting 297

### Attendance:

DESY: Ulrich Einhaus, Leif Jönsson, Uwe Krämer

Vidyo: Jochen Kaminski, Claus Kleinwort, Shinya Narita, Ron Settles, Akira Sugiyama

### General News:

Jochen reminded everyone that the Collaboration Meeting will be very soon. He still has received no additional suggestions regarding the agenda, in particular no talks.

Uli also reminded everyone, who wants to attend in person, to register.

Akira reported, that the Japanese HEP community has given counter arguments to the questions/statements of the SCJ. The conclusions of the SCJ are still not final nor made public. But any insides regarding the status of the final document could not be given.

### PCMAG/LP setup, test beam:

Uli: PCMAG/TRACI/test beam area:

- The test beam of Paul went well, as far as Uli knows. There were no major problems of the facility or the test beam area. Data taking went well and only at the end of the test beam, there seemed to have been problems with the electronics.

### News from the groups:

Leif reported that 705 packages SALTOR-ASICs have arrived at Lund and are awaiting testing now. Still the problem persists that only 2 channels can be tested at a time and this makes the process unbearably slow. Any help with improving the code is very urgently needed now. Besides, the new MCM testboard has been delivered. The new CPLD and the passive components have been mounted at DESY. The connectors will be mounted at Lund. Also, here for testing the functionality some help with the FPGA code is desperately needed.

### AOB:

The next workpackage meeting will take place on December 13<sup>th</sup>.
