

## FCAL software and analysis meeting, February 13, 2019

### Meeting Minutes

**Zhanna** presented her plan for ILD background simulation study. She is waiting the Grid certificate in order to access the MC data. **Sergej** recommended that she start with background study in LHCaI and then to have a look on the new simulation data at 250GeV energy collision using different detector models (wo/w anti-DID field).

During the meeting, we discussed about the new TB opportunity:

**Aharon** suggested to book a few days at the end of this year, even the FLAME will not be ready. In conclusion, **Wolfgang/Sergej** try to get 3 -5 days in November/December and a few days in February 2020.

**Hans** are working on charge divider and the preliminary results will be ready for upcoming FCAL workshop from CERN.
