

## FCAL software and analysis meeting, 26 February 2020

### Meeting Minutes

The meeting was dedicated to the latest TB preparation:

- Sergej – prepared the INDICO page – please register!
- Yah will send an official e-mail to the TB coordinator in order to request a crane for Monday to help us to move all heavy stuff inside the TB area.

On Monday, all ASICs (FLAME and APVs) will be connected to the Si sensors.

It was a short presentation given by Bohdan about High gain to low gain events correlation. The example was for **run #57 using FEC0**. The plots were uploaded to the meeting page.

We decided to send an abstract to the ICHEP2020 Conference and also to ask Ivanka to give a short presentation to the upcoming CLIC Workshop about the latest results (2019 test-beam) and to show a few pictures of the 2020 test-beam setup.
