

Status report

R. Yonamine

RHN analysis : Solved the problem with Hadronization I had last week thanks to helps from Junping and Fujii-san.

I'm still not sure if I correctly set helicity combination / charge combination etc. To confirm it works as we expect, I have to learn a bit more about Bases basics.

Once I can be confident, I will generate some events and see some distributions.

Vertexing check with new test samples : underway

File staging is taking longer time than usual (still waiting).
Will check vertex position etc.
