

FCAL software and analysis meeting, 1 July 2020 - Meeting Minutes

No presentations at all. We have round table discussions.

Thanks to Ibtisam there is a new folder on the FCAL webpage called "All TestBeam" with four subfolders for 2014 – 2020 test beam. TB2020 link all data taken in march this year, the data are store at Cracow server. The data are protected; the user mane and the password can be taken from me or from Ibtisam.

Ivan need more time to install all stuff for TB simulation.

Pasha is working on FLAME data analysis and then he will try to connect the SRS and FLAME data.

Alina is working on simulation; she will implement in geant4 all 5 geometry configurations with FLAME readout board in the stack.

In parallel we need to do the calibration in order to be used for reconstruction.

Next meeting would be on 15 July.
