

## New KEKCC system

- 8/31(Mon) 12:00 Old system (SL6) service out  
9/1(Tue) 13:00 New system (CentOS7) service in
- Account, group disk (+100TB), tape : Same as old system  
Home directory : cleaned.
  - Old home is kept 1 year at `/gpfs/home/old/<group_name>/<user_name>/`
- Disk space for ILCDirac storage (KEK-DISK, 300TB).
  - `/gpfs/group/ilc/grid/storm`  
dst-merged files will be replicated here eventually
- Software
  - ilcsoft in cvmfs : Executables built for SL6 works, but building your source with SL6 libraries may fail.
  - `/sw/ilc/ilcsoft/gcc820` : ilcsoft libraries built on CentOS7
  - gfortran : **legacy fortran** features are not supported by `gcc820`(compiler for ilcsoft) nor `gcc485`(CentOS7 default).
    - Ex: tauola used by whizard1.95 failed. Patched version is in whizard2.
