

Brief report from today's SW conveners' meeting

Daniel Jeans/KEK
2020/10/7

Generator (Mikael)

- flavour tag training samples are generated
 - few tweaks to meta-data format needed
- small cross-section samples have been generated
- will next move onto the medium-xsec samples

MC-Production (Akiya)

- Flavor tag ZH samples (6x50k events).
 - Sim+reco completed; dst-merging etc will complete soon
- will start on remaining flavour tag samples, once meta-data is fixed
- ... then move onto the "small" samples.
- "large" samples, which will have several 1000s of files,
 - may have issues in ilcdirac (total number of files/directory)

ilcsoft (Remi)

- setup ilcsoft installation using Docker
- used to create centos7 installation (v02-02) on cvmfs
 - `/cvmfs/ilc.desy.de/sw/x86_64_gcc82_centos7/v02-02/`
- when to switch production system to centos7 ?
 - should be soon, SL6 is nearing end-of-life.
