

Weekly report

R. Yonamine (Tohoku U.)

● LCFIPlus with SGV

- In the way of preparing a full simulation samples that can be easily compared to SGV samples,
- Stuck at grid job failures after several submission
 - ➔ Problem found in my script (I created a Marlin job object once and I used it repeatedly for several submission. —> Input files were piled up during submission.)
 - ➔ After some additional checks, will resume submission

● LCFIPlus with GPU

- Found that GPU didn't work during my LCFIPlus training.
- Simple keras python script seemed to work. —> Investigating how to fix this problem.
