

## **FCAL software and analysis meeting, 28 October 2020 - Meeting Minutes**

No presentations at all. We have round table discussions.

**Pasha** is working on SRS data analysis, he is looking on pedestal runs in order to see the noise distribution and compare his results with Veta's plot. Also he will try to connect the FLAME data with SRS data in order to do shower development analysis.

**Young students from TAU just back to** lab and they are working on APV calibration.

Thanks to **Bohdan, Elizaveta** a young student from Kiev University have a look on root files from TB2020 data.

**Ivan** would like to focus on experimental data analysis.

The next meeting would be in 2 weeks – on 11 November 2020.
