

FCAL software and analysis meeting, 9 December 2020 - Meeting Minutes

No presentations at all. We have round table discussions.

Roma is working on **FLAME** data and she try to connect its with Telescope data in order to do track reconstruction. She got some details from Sasha about telescope software for alignment and track reconstruction.

Pasha is working on SRS data analysis, he still focus on noise analysis. Also he will try to connect the FLAME data with SRS data in order to do shower development analysis.

One of young students from TAU is working on APV calibration.

Ivan makes some progress on SRS signal analysis. He got some plots but he cannot explain some distribution. For next meeting he will prepare a few slides. Also, he hope to involve a master or phd student in data analysis or MC simulations.

The next meeting would be in one week – on 16 December 2020.
