Probing extended Higgs sectors by the synergy between the LHC and the ILC

Thursday, 28 October 2021 19:40 (20 minutes)

We discuss a possibility that the parameter space of the two Higgs doublet model is significantly narrowed down by considering the synergy between direct searches for additional Higgs bosons at the LHC and its luminosity upgraded operation and precision measurements of the Higgs boson properties at future electron-positron colliders such as the International Linear Collider.

The talk is based on Nucl.Phys.B 966 (2021) 115375 (arXiv: 2010.15057).
