

## **FCAL software and analysis meeting, 2 June 2021,**

### **Meeting Minutes**

**Ben** talked about APV calibration approach, he tried to find the ration between master and slave board. He checked the pulse shape using an extra capacitor with 40pF. TO DO list: to check the pulse for different channels, to remove the extra capacitor and find the pulse shape.

**Ivan**, presented an update on SRS data analysis. He compared the occupancy plots for HG and LG using different cuts for signal selection. TO DO list: to have a look on energy deposition on each plane equipped with APVs board.

**Alina's** computer crashed and she need more time to reinstall the codes on the new one. She hope in 2 weeks to manage this inconvenient.

**Veta** will take over the talk for ANIMMA conference.

The next meeting will be in 2 weeks, on 16 June 2021 at 4 pm CERN time zone.
