

## Minutes of WP-meeting 356

### Attendance:

Zoom: Yumi Aoki, Paul Colas, Ralf Diener, Ulrich Einhaus, Serguei Ganjour, Jochen Kaminski, Paul Malek, Tomohisa Ogawa, Oliver Schäfer, Ron Settles, Jan Timmermans, Maxim Titov

### General News:

Based on the report of Keisuke during the ILD meeting Maxim and Ron discussed the situation of ILD: Currently, a delay by one year seems likely, as more discussions are required. The general election in Japan will take place either in the last week of October or in the first week of November. Before a new government has been formed no further decisions will be taken. But the MEXT advisory committee will meet and discuss the next steps.

There will be an ILCX workshop on October 25<sup>th</sup> to 29<sup>th</sup> to discuss other experiments which could be conducted at the ILC.

There is also a new position in the CERN management, which will deal with future accelerators and detectors outside of CERN.

### PCMAG/LP setup, test beam:

Ralf: Test beam schedule:

- The test beam resumed in August. So far there were still some open time slots, but for the rest of the year there are no more. A PCR test is still required to enter DESY and do a test beam.

### News from the groups:

Paul will have his 2pCO<sub>2</sub> test of the 3D-printed cooling unit in mid-October. Probably, Serguei, Paul and a technician will come to DESY.

Ulli and Peter are still in discussion about the correct conversion and extrapolation of the dE/dx measurements to the separation power.

### AOB:

The next workpackage meeting will take place on September 23<sup>rd</sup>.
