CALICE Collaboration Meeting IFIC/Valencia and virtual – April 2022

- Thanks once more to
Adrian Irlles, Iulia Mich (ADEIT Secretary)
And the CSIC for hosting us in this exceptional place

- Thank you very much for your excellent contributions
- This meeting reflected the entire spectrum and wealth of the CALICE Activities
 - From test bench measurement at single counters to the validation of the GEANT4 models
 - Testbeams with prototypes including the strength of acting as a collaboration
 - Spreading it into real projects
 - HGCal but also smaller stepping stone projects
- CALICE is an ideal environment for forming and training of ECR
 - We may have to convey this better
- CALICE contributing visibly to the shaping of the future of the field
 - Strong participation to the ECFA Detector R&D Roadmap and its implementation and to the
 - Snowmass process
 - This will clearly have an impact on the future of CALICE
- We have to make these processes our own and transport the “CALICE spirit” into the future

- We will let you know well in time dates and place of the next CALICE Meeting
- I wish you a safe way home
