Overview of flavor tagging by GNN

Step1 training

Network: GCN(Graph Convolution Network) 3Layer

<Semi-Supervised Classification with Graph Convolutional Networks: arXiv:1609.02907>

- In step1, we classify nodes to identify VC that do not exist.
- Answer label
 - 0 : NC ... Non-existent Vertex
 - 1 : PV ... Pair from primary vertex
 - 2 : SVBB ... Pair from secondary vertex of b-flavor
 - 3 : SVCC ... Pair from secondary or tertiary vertex of c-flavor
 - 4 : Others ... Other track pair
 - 5 : Track
